

# You'd Better Read Me News

February 2022

Lynette is back at it again, trying to improve her drawings and paintings. . .so of course, she tried using Rebelle from Escape Motions, again!

She had briefly presented Rebelle a few years ago to ATX as part of a “draw from your photos” presentation. That presentation was just an overview because Rebelle is so encompassing as far as tools and techniques, and features, she just could not fit them all in. . . well, truth is she did not know how to use them well enough!!!

Just now, Rebelle has just gotten an upgrade with new even more realistic pigments - Yes, pigments!

So rather than try to learn all the new features, and the old ones better, she reached out to the developer, Escape Motions.

After many emails back and forth, lots of pleading and convincing, this time she succeeded in getting them to find us a presenter who really knows the product!

So for our February 19, online zoom meeting, ATX will be presenting, demoing, teaching Rebelle as much as we can fit in!

If you are a *photographer*, this meeting will give you ideas not only for drawing from a photo - like tracing and cloning colors, but also for composition. Plus there are some options in Rebelle that totally apply to editing photography.

And seeing how a traditional artist looks at a photo before drawing from it, will help you “see” what your viewers will see in your photos, and thus you can get ideas on how to guide the viewers eye and to control your “focus” to better engage your audience.

If you are a photographer who would like to learn to

draw, then Rebelle is a perfect way to learn.

If you are a *mixed media artist* - such as mixing photos and art tools, then you will really enjoy the options Rebelle brings.

If you are an *educator*, you need to see this application! There is a special deal for a free Rebelle 5 volume license for up to 20 seats for schools!!!

If you are an artist with traditional media and have a computer as well, then this meeting will blow your mind!

Our presenter is on the east coast and is both a photographer and artist, so his presentation will be perfect for our ATX group.

YES, there is a **DISCOUNT CODE** on Rebelle 5 or Rebelle 5 Pro for those who purchase, a **BIG 20%** discount!

And YES, there is a different discount for those upgrading from Rebelle 4!

And YES, there is a different discount for teachers and students !

And YES, there will be a copy of **Rebelle 5 Pro** for the Raffle !!!!!
